- 1 If you've been in an accident, you should attend.

You Should Attend!

What's This Course About?

Auto Liability insurance is the most used line of insurance Risk Management & Tort Defense administers for the State of Montana. Unfortunately, good state employees are involved in vehicle accidents.

This course from the National Safety Council explains many of the contributors to vehicle accidents and provides NEW rules of the road for a defensive driver. Attendees become more aware of the risks and hazards in many adverse driving conditions and are provided many new techniques to reduce these risks.

Unsafe driving behaviors are identified and defensive driving techniques are provided to reduce the incidence of these behaviors.

Safety features of modern vehicles are explained to show their contribution to your safety.

By orienting state employees to the current concerns of driving and providing them with defensive driving techniques, the occurrence of state employees and state vehicles being involved in vehicular accidents has decreased. In turn, the expenses of insuring state vehicles continue to be managed.
